0.00
Function (sorted by Class)
R system inhibited
CRISPR−Cas evasion
Type I TA system
Type II R−M system
Type II TA system
Type III R−M system
anti−CRISPR−associated gene
antirestriction protein
HTJ
adaptor
head closure
tail completion
tail terminator
DNA annealing protein
DNA binding protein
DNA helicase loader
DNA helicase
DNA ligase
DNA polymerase
DNA primase
Holliday junction resolvase
RNA ligase
RNA polymerase
clamp loader of DNA polymerase
dCMP deaminase
dUTPase
endonuclease
exonuclease
partition protein
replication initiation protein
ribonucleoside reductase
ribonucleotide reductase
ssDNA binding protein
thioredoxin domain
thymidylate synthase
capsid assembly
capsid decoration
capsid
internal virion protein
major capsid
minor capsid
portal
scaffolding
terminase large
terminase small
excisionase
integrase
transposase
endolysin
holin/anti−holin
lysis inhibition
spanin
2OG−Fe(II) oxygenase
glycosyltransferase
membrane protein
DNA methyltransferase
MazG−like pyrophosphatase
deoxynucleoside monophosphate kinase
acetyltransferase
metallo−phosphoesterase
lipoprotein
nucleotide kinase
polynucleotide kinase
baseplate hub
baseplate wedge
baseplate
major tail
minor tail
tail assembly
tail fiber assembly
tail fiber
tail length tape measure
tail sheath
tail spike
tail tube
Arc−like repressor
anti−repressor
transcriptional activator
transcriptional factor
transcriptional regulator
transcriptional repressor
class
antidefence
connector
DNA, RNA and nucleotide metabolism
head and packaging
integration and excision
lysis
moron, auxiliary metabolic gene and host takeover
other
tail
transcription regulation
